## Introduction

The aim of the CHARTER project has been to advance state-of-the-art knowledge on Arctic biodiversity change and social-ecological systems (SES) on four critical fronts: i) Feedbacks: To understand transitions in vegetation cover, energy balance and cryospheric change at centennial, decadal, and present-day time scales; ii) SES and biodiversity: To understand the effects of biodiversity changes on Indigenous/local communities and traditional livelihoods, e.g. reindeer herding; iii) Modelling: To integrate biochemical/permafrost soil carbon exchange, sea ice and albedo into an Earth System Model (ESM), and incorporate these into the latest Arctic Regional Climate modeling efforts; and iv) Policy: To develop strategies supporting Arctic communities with co-benefits and synergies between adaptation, mitigation and policy implications. To accomplish these, CHARTER has combined expertise from Earth System sciences, biodiversity indices and SES research. CHARTER has been an ambitious effort to advance the modelling of 21st century Arctic change with major socio-economic implications and feedbacks for the cryosphere. CHARTER has brought strongly participatory approaches that incorporate Indigenous/local communities' ways of knowing regional changes with state-of-the-art research on circumpolar climate dynamics and long-term palaeoecological studies. CHARTER has collated and processed truly transdisciplinary quantitative and qualitative empirical datasets for a holistic view that can be modeled. Arctic residents and stakeholders have worked alongside scientists to identify risks and viable adaptation strategies in relation to projected changes and future resilience in Arctic SESs. CHARTER combined natural sciences with ESM and participatory approaches to leverage the untapped potential for wild ungulate and livestock management to regulate global climate feedbacks through 'biogeoeengineering'. CHARTER has produced new tools and data, and has supported and established public ARCTIC related dialogue. These, together with CHARTER's scientific results will support implementing sustainable Arctic strategies for decades to come.

CHARTER project tasks were distributed across multiple cross cutting work packages which ranged across academic disciplines and temporal timescales. A focus of several tasks was placed on synthesis which has resulted in the creation of the ground breaking Arctic Holocene Database, as well as significant steps towards the difficult task of comparing vegetation structures across Finland, Sweden and Norway. New tools including remote sensing, AI and drone campaigns were used extensively. A catalogue of rain-on-snow events derived from a reanalysis of remote sensing data was created. While workshops are not new in this field, CHARTER took steps to initiate new dialogue inducing techniques that included games and other hands-on activities to build trust and engagement. This included a citizen science component. As part of mainstream outreach, the project collaborated with the Arktikum Science Centre in Rovaniemi, Finland, to create two exhibit stations that focused on rain-on-snow and the study of snow.

In this report we list the scientific publications produced in CHARTER and published in peer-reviewed journals between August 2020 and January 2025. We also list other important publications, as well as data and tools produced by CHARTER.

## List of scientific publications

Akperov, M., Wenxin Zhang, Paul A Miller, Igor I Mokhov, Vladimir A Semenov, Heidrun Matthes, Benjamin Smith and Annette Rinke. 2021. Responses of Arctic cyclones to biogeophysical feedbacks under future warming scenarios in a regional Earth system model. *Environmental Research Letters*, Volume 16, Number 6

In addition, several submitted works.

## **Other important publications, data and tools produced by CHARTER**

### **Outreach and publications for general public and livelihood practitioners:**

A Birds Eye View. Drones: A New Lens for Science, A New Tool for Herding

By Philip Burgess, Jeff Kerby, Miguel Viloslada :

<https://storymaps.arcgis.com/stories/3f270d210de44fdf9280ded4fd89095d>

The Vanishing Palsa Mire. Often Seen, Little Understood, Under Threat

By Philip Burgess.

<https://storymaps.arcgis.com/stories/c09e93eb17da45ac9cc8257018b0995f>

For centuries, herders followed their reindeer...Now, their animals follow them.

By Irina Wang & Philip Burgess

<https://storymaps.arcgis.com/stories/26d9be8cad5b431a85bdea38a344047c>

In 2050, what will my corner of the world look like? Mention the phrase 'climate change' and reactions differ: Indifference. Misunderstanding. Anxiety. Anxiety fatigue. By Philip Burgess, Heidrun Matthes, Sirpa Rasmus

<https://storymaps.arcgis.com/stories/95207a47d7bf4d5bb674a66da6a3db79>

When Rains Fell in Winter. A decade ago, heavy winter rains washed over the Yamal Peninsula in Northwest Russia, killing 60,000 reindeer and ruining livelihoods.

By Philip Burgess & Irina Wang

<https://storymaps.arcgis.com/stories/b63ced1af26a435bbfd4a910c8fac488>

Kun talvella satoi

Kymmenen vuotta sitten Jamalin niemimaalla satoi talvella rankasti, minkä seurauksena 60 000 poroa kuoli ja ihmiset menettivät elinkeinonsa.

Philip Burgess & Irina Wang

## **CHARTER data and metadata; tools developed:**

CHARTER data on the ZENODO platform

<https://zenodo.org/communities/charter/records?q=&l=list&p=1&s=10&sort=newest>

CHARTER has aimed at utilizing existing material as much as possible. Nevertheless, new data has been gathered and tools have been developed. Some examples:

CHARTER Citizen science snow measurements and snow protocol:

<https://zenodo.org/records/14259269>

CHARTER project 'Secrets of Snow' protocols:

<https://www.charter-arctic.org/secrets-of-snow/>

CHARTER-HANKKEEN KANSALAISHAVAINTOJA LUMESTA: <https://www.charter-arctic.org/secrets-of-snow/lumen-salaisuuksia-ratkomassa/>

Playing With Dreams - Workshop Playing Cards:

Openly accessible design process; workshop material and a guide for facilitating future-oriented workshop. Developed by Irina Wang, with Sirpa Rasmus, Simo Sarkki, Otto Habeck, Philip Burgess, Antti-Juhani Pekkarinen and Jussi Eronen.

<https://zenodo.org/records/10038003>

Arctic Holocene Biodiversity Database. Available at <https://acm.im/holocene-arctic-biodiversity-map/ahbdb/>

**Metadata:** see the appendix. WP3 metadata also available in Zenodo and in D3.6, and WP6 metadata in D6.5

## **CHARTER deliverables**

Below we list CHARTER deliverables per WP. Years refer to the time of the original submission (not to the time of revision, if revisions were asked in project reviews). Authors are given as listed in the reports. Some reports are confidential, only for members of the consortium (including the Commission Services). Public reports are found here: <https://www charter-arctic.org/charter-deliverables/> and here: <https://cordis.europa.eu/project/id/869471/results>. More information from leading authors of the reports, and from CHARTER coordination team.

### **WP1 - Transitions in land cover, biodiversity and cryosphere at decadal time scales**

Bartsch, A. and CHARTER WP1 team. 2022. Improved characterization of observables of drivers and impacts on panarctic scale. CHARTER deliverable D1.1 (Confidential).

Kumpula, T. Bartsch, A. and CHARTER WP1 team. 2023. Improved characterization of impacts on local to regional scale. CHARTER deliverable D1.2. (Confidential).

Bartsch, A., Leppänen, L., Schaepman-Strub G., Oehri, J., Macias-Fauria, M., Spiegel, M., Bergstedt, H., Tanguy, R., von Baeckmann, C., Efimova, A., Khairullin, R., Muri, X., Widhalm, B., Rixen, R., Stroeve, J. and McCrystall, M. 2024. Combination of satellite and in situ records for regional characterization (original title: Report on pan-Arctic biodiversity change on decadal scale). CHARTER deliverable D1.3 (Confidential).

### **WP2 - Changing grazing regimes and Arctic biodiversity at local and regional scales**

Stark, S., Horstkotte, T., Kumpula, J., Olofsson, J., Tømmervik, H. and Turunen, M. 2022. Synthesis on the effect of grazing and trampling on plant biodiversity. A case study of northernmost Fennoscandia (original title: Synthesis on the effect of grazing and trampling on plant biodiversity at a circumpolar level). CHARTER deliverable D2.1. <https://www charter-arctic.org/charter-deliverables/>

Stark, S., Wallén, H., Kuoppamaa, M., Kumpula, J., Kurkilahti, M., Pekkarinen, A.-J., Horstkotte, T., Olofsson, J., Tømmervik, H., Bårdesen, B.J. and Bjerke, J.W. 2024. Expected habitat-specific vegetation trajectories under differing grazing management practices, land-use histories and environmental conditions. CHARTER deliverable D2.2. <https://www charter-arctic.org/charter-deliverables/>

Ehrich, D., Ramirez, J.I., Barbero-Palacios, L. and Speed, J. 2025. Comparative assessment of Arctic food webs in contrasting reindeer management and climatic regimes. (original title: Estimates of relative presence of predators feeding on reindeer carcasses). CHARTER deliverable D2.3. <https://www charter-arctic.org/charter-deliverables/>

## **WP3 - Socio-economic impacts of Arctic environmental changes on indigenous populations and local communities**

Habeck, J.O., Rasmus, S., Horstkotte, T., Istomin, K., Marin, A. and Tømmervik, H. 2021. Compiling reindeer statistics (original title: Report: statistics on animal husbandry). CHARTER deliverable D3.1. <https://www.charter-arctic.org/charter-deliverables/>

Marin, A. and the WP3 team. 2022. History of animal husbandry in CHARTER study area (original title: Report: history of animal husbandry in key regions). CHARTER deliverable D3.2. <https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Rasmus, S., Turunen, M., Horstkotte, T., Tømmervik, H., Komu, T. and Eilola, S. 2022. CHARTER first-round stakeholder workshops (original title: Report: translated minutes of 1st-round stakeholder workshops). CHARTER deliverable D3.3.  
<https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Matthes, H., Forbes, B.C., Istomin, K., Komu, T., Laptander, R., Rasmus, S. and Tømmervik, H. 2022. Overview of socioeconomic parameters for modelling. CHARTER deliverable D3.4 (Confidential).

Istomin, K., Habeck, J.O., Laptander, R., Tømmervik, H., Horstkotte, T. and Rasmus, S. 2023. Socio-economic processes in selected communities: The interplay of formal and informal institutions and practices in reindeer herding (Russia and Fennoscandia) (original title: Report: socio-economic processes in selected communities). CHARTER deliverable D3.5. <https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Eilola, S., Horstkotte, T., Istomin, K., Komu, T., Laptander, R., Marin, A., Rasmus, S. and Tømmervik, H., 2024. Summary of CHARTER WP3 field research: data collection, metadata, key findings from selected communities (original title: Summary: interviews conducted in selected communities). CHARTER deliverable D3.6.  
<https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Horstkotte, T., Rasmus, S. and Tømmervik, H. 2024. CHARTER 2nd-round stakeholder workshops (original title: Report: translated minutes of 2nd-round stakeholder workshops). CHARTER deliverable D3.7. <https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Eilola, S., Fagerholm, N., Forbes, B.C., Horstkotte, T., Istomin, K., Komu, T., Laptander, R., Marin, A., Rasmus, S., Stammler, F. and Stark. S. 2024. Land users' observations on environmental change. CHARTER deliverable D3.9.  
<https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Horstkotte, T., Istomin, K., Melamies, I., Rasmus, S., Sandström, P. and Sandström. S. 2024. Leverage and Leeway: Comparing the Scope of Reindeer Herd Management and Decision-Making in Four Communities of the Eurasian North (original

title: Land-use and pasture management changes). CHARTER deliverable D3.10.  
<https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Istomin, K., Laptander, R., Horstkotte, T., Rasmus, S., Tømmervik, H. and Marin, A. 2024. Futures of Reindeer Herding (original title: Land users' expectations and prospects of reindeer husbandry). CHARTER deliverable D3.11. <https://www.charter-arctic.org/charter-deliverables/>

Habeck, J.O., Bartsch, A., Ehrich, D., Eronen, J.T., Istomin, K., Laptander, R., Macias-Fauria, M., Marin, A., Matthes, H., Rasmus, S., Stark, S., Forbes, B.C. 2025. Synthesis of Findings [WP3 and others] (original title: WP3 synthesis). CHARTER deliverable D3.8.  
<https://www.charter-arctic.org/charter-deliverables/>

#### **WP4 - Arctic terrestrial biodiversity changes at centennial time scales**

Macias-Fauria, M., Martin, A. and the WP4 team. 2023. Systematic Map (original title: Systematic review & map, identifying sources of biodiversity proxy data for the Arctic through the Holocene). CHARTER deliverable D4.1. <https://www.charter-arctic.org/charter-deliverables/>

Macias-Fauria, M., Martin, A. and the WP4 team. 2023. Holocene Arctic Biodiversity Database (original title: Holocene climate and cryosphere database). CHARTER deliverable D4.2. <https://www.charter-arctic.org/charter-deliverables/>

Macias-Fauria, M. and the WP4 team. 2023. Holocene Climate and Cryosphere Database (original title: Pan-Arctic paleoecological database). CHARTER deliverable D4.3.  
<https://www.charter-arctic.org/charter-deliverables/>

Martin, A., Macias-Fauria M. and the WP4 team. 2024. Key essential biodiversity / ecosystem variables (original title: Key biodiversity variables computed from the data in D4.2. and MS4.2). CHARTER deliverable D4.4. <https://www.charter-arctic.org/charter-deliverables/>

Martin, A. and the WP4 team. 2025. Scaffolding key indicators of Holocene Arctic biodiversity change (original title: Research paper reporting trends of key biodiversity variables in the Arctic during the Holocene, and on how they compare with contemporary, recent observations). CHARTER deliverable D4.5. <https://www.charter-arctic.org/charter-deliverables/>

Martin, A., Macias-Fauria M., Bradshaw, R. and the WP4 team. 2025. Sensitivity of key indicators of Holocene Arctic biodiversity to climate/environment (original title: Research paper). CHARTER deliverable D4.6. <https://www.charter-arctic.org/charter-deliverables/>

Piilo, S., Kuoppamaa, M., Tahvanainen, T., Kumpula, T., Kuosmanen, N., Macias-Fauria, M. and Välimäki, M. 2025. Research paper reporting on the relationships between key

biodiversity variables and the environment in CHARTER sites during the Holocene, with a special focus on i) the role of large herbivore density and ii) the last 2ka and the effects of the emergence of Arctic husbandry on these relationships (original title: Research paper). CHARTER deliverable D4.7. <https://www.charter-arctic.org/charter-deliverables/>

Martin, A., Macias-Fauria M. and the WP4 team. 2025. Comparison of biodiversity trends in the Holocene vs. the observational period and modelling outputs, part I (original title: Research paper). CHARTER deliverable D4.8. <https://www.charter-arctic.org/charter-deliverables/>

Martin, A., Macias-Fauria M. and the WP4 team. 2025. Comparison of biodiversity trends in the Holocene vs. the observational period and modelling outputs, part II (original title: Research paper). CHARTER deliverable D4.9. <https://www.charter-arctic.org/charter-deliverables/>

## **WP5 – Designing futures based on system-wide natural and human drivers**

Matthes, H., Moore, J., Eronen, J.T., Schaepman-Strub, G. and the WP5 team. 2022. Definition of 'biogeoengineering' scenario experiments (original title: Production of future 'biogeoengineering' scenarios). CHARTER deliverable D5.2. <https://www.charter-arctic.org/charter-deliverables/>

Matthes, H., Ménard, C., Chen, Y., Essery, R., Moore, J., Stroeve, J., Veyssiére, G. and McCrystall, M. 2023. Analysis of existing climate model simulations (original title: Analysis of existing climate model data from AR6, G4 and CMIP6 including GeoMIP6). CHARTER deliverable D5.1. <https://www.charter-arctic.org/charter-deliverables/>

Matthes, H., Ménard, C., Chen, Y., Essery, R. and Moore, J. 2023. Implementation of 'biogeoengineering' scenarios and the Factorial Snow Model. CHARTER deliverable D5.3 (Confidential).

Matthes, H., Ménard, C., Chen, Y., Essery, R. and Moore, J. 2024. Analysis of model simulations under the 'biogeoengineering' scenarios. CHARTER deliverable D5.4 (Confidential).

Matthes, H., Forbes, B.C. and Rasmus, S. 2024. Synthesis of cryosphere and biodiversity changes in present, past, future (original title: Synthesis of scenario-driven biodiversity changes). CHARTER deliverable D5.5. <https://www.charter-arctic.org/charter-deliverables/>

## **WP6 - Narratives and policy options for biodiversity and land use to increase resilience of Arctic social-ecological systems**

Eronen, J.T., Rasmus, S. and the WP6 team. 2022. Biodiversity and land use narrative synthesis (original title: Biodiversity and land use narrative synthesis based on an

extensive literature review). CHARTER deliverable D6.1. <https://www.charter-arctic.org/charter-deliverables/>

Eronen, J.T., Rasmus, S., Yletyinen, J. and the WP6 team. 2023. Mapping of stakeholder network required for the co-design of pathway narratives by means of a social network analysis. CHARTER deliverable D6.2 (Confidential).

Tømmervik, H., Bjerke, J.W., Eronen, J.T., Rasmus, S., Habeck, J.O., Istomin, K. and Horstkotte, T. 2024. Examination of Arctic land use and biodiversity management practices: Links between local livelihoods, albedo, and climate (original title: Examination of Arctic land use and biodiversity management practices including local livelihoods). CHARTER deliverable D6.3. <https://www.charter-arctic.org/charter-deliverables/>

Eronen, J.T., Rasmus, S., Sarkki, S., Forbes, B.C., Tømmervik, H., Habeck, J.O., Horstkotte, T. and Matthes, H. 2024. Co-design of policy options to inform climate adaptation and mitigation policies and practices and enhance the viability and resilience of Arctic local livelihoods. CHARTER deliverable D6.4. <https://www.charter-arctic.org/charter-deliverables/>

Eronen, J.T., Rasmus, S., Sarkki, S., Forbes, B.C., Tømmervik, H., Habeck, J.O., Horstkotte, T. and Matthes, H. 2025. Cross-cutting work with all CHARTER WPs to develop Arctic strategy and provide policy recommendations. CHARTER deliverable D6.5. <https://www.charter-arctic.org/charter-deliverables/>

## WP7 - Management and dissemination

Rasmus, S., Forbes, B.C. and CHARTER Coordination team. 2020. CHARTER management processes – Management handbook (original title: Management processes established and functional). CHARTER deliverable D7.1. <https://www.charter-arctic.org/charter-deliverables/>

Burgess, P., Heikkilä, M. and CHARTER coordination team. 2020. CHARTER Website and Communication Tools. CHARTER deliverable D7.2. <https://www.charter-arctic.org/charter-deliverables/>

Rasmus, S., Habeck, J.O. and CHARTER coordination team. 2021. CHARTER Gender inclusion action plan. CHARTER deliverable D7.3. <https://www.charter-arctic.org/charter-deliverables/>

Heikkilä, M. and CHARTER coordination team. 2021. Communication plan. CHARTER deliverable D7.4. <https://www.charter-arctic.org/charter-deliverables/>

Leppänen, L., Komu, T. Rasmus, S., Barrio; I., Matthes, H., Kontu, A., Habeck, J.O., Marin, A., Stammler, F., Laptander, R., Istomin, K. and CHARTER coordination team. 2021.

CHARTER Data Management Plan. CHARTER deliverable D7.5. <https://www.charter-arctic.org/charter-deliverables/>

Burgess, P. and CHARTER coordination team. 2024. Interactive interface. CHARTER deliverable D7.14. <https://www charter-arctic.org/charter-deliverables/>

CHARTER coordination team. 2024. Fourth Annual meetings of the Steering Committee and the Expert Advisory Group. CHARTER deliverable D7.17 (Confidential).

Rasmus, S. Landauer, M. and CHARTER coordination team. 2025. Evaluating the impacts of CHARTER science-policy dialogue. CHARTER deliverable D7.15.

<https://www charter-arctic.org/charter-deliverables/>

CHARTER coordination team. 2025. List of created scientific publications, other important publications, and data and tools produced by CHARTER (original title: List of created scientific publications). CHARTER deliverable D7.16. <https://www charter-arctic.org/charter-deliverables/>

## CHARTER milestones

MS1: CHARTER kick-off meeting, Consortium, SC and EAG up and running

MS2: Governance structure and documents established and approved by the SC and distributed amongst the consortium for implementation. Documentation in D7.1

MS3: Early-phase consultation with local land users on additional drivers of biodiversity change - Meeting minutes / summaries in: UHAM and the CHARTER coordination team. 2021. Early-phase consultation with local land users on drivers of biodiversity change. Milestone report (Confidential, only for members of the consortium; including the Commission Services).

MS4: Literature review done, papers written and submitted - Literature review documents in D6.1, paper submission/publication: Rasmus et al. 2024. One Earth. 7(2): 265-279. <https://doi.org/10.1016/j.oneear.2023.12.010>

MS5: Stakeholder mapping done, workshops for period I in Finland and Sweden organized – Stakeholder mapping material shared withing consortium (Confidential); Report, workshop minutes / summaries published in D3.3.

MS6: Documentation/database of existing relevant records done - Database with documentation available. Reported in D1.1.

MS7: Implementation of biogeengineering scenarios “Reindeer management” - Implementation in place. Reported in 5.3.

MS8: Documentation/ database of high resolution satellite observations done - Database with documentation available. Reported in D1.2

MS9: New environmental proxy material sampled from CHARTER key sites: Field case study report. Reported in D4.3.

MS10: Research papers on stakeholder network analysis and co-design process submitted. Work based on analyses and utilizing the co-design process submitted: Sarkki et al. to Globalizations; Journal of Land Use Science; Land Use Policy.

MS11 Half-way assessment of project impacts: Assessment report published CHARTER coordination team. 2022. Half-way assessment of project impacts.

<https://www charter-arctic.org/wp-content/uploads/2022/12/CHARTER-Half-way-impact-report.pdf>

MS12: Workshop I in Norway organized: Workshop minutes: Tømmervik, H. 2023. Report from the seminar/workshop in Plassjesne-Rossen tjelte – Røros, Norway August 15th -16th 2023. Milestone report (Confidential, only for members of the consortium; including the Commission Services); workshop minutes / summaries in D3.7.

MS13: Documentation of feedback and dependencies analyses done: Reported in D1.3.

MS14: New environmental proxy material analyzed from CHARTER key sites: Field case study report. Reported as part of CHARTER 36-month reporting.

MS15: Workshop for period II organized in Finland, Sweden, Norway and additional consultation (with possibly a workshop) held in other parts of the arctic - Workshop minutes/summaries published in D3.7.

MS16 Townhall events and world cafes organized - Meeting minutes/summaries published in D6.5.

MS17 Long-term data storing and sharing tools and services in place. ZENODO platform: <https://zenodo.org/communities/charter/records?q=&l=list&p=1&s=10&sort=newest>

MS18: Interactive interface in Arktikum Science Centre Exhibition (Rovaniemi, Finland). Interface in place; more about the renewed exhibition: <https://arktikum.fi/en/exhibitions/arctic-opposites/>

MS19: Briefing note of the final report. Note will be published when the final reporting will be finalized (Feb-March 2025).

## APPENDIX – Metadata

WP3 metadata also available in Zenodo and in D3.6, and WP6 metadata in D6.5.

Title /Dataset	Creator	Creator's affiliation	Contributors	Time-span start	Time-span end	Location	Type of data	Description	Method	Keywords	Open data? Link to the repository (or contact)	File format	License
Circumpolar mid-winter thaw and refreeze based on fusion of Metop ASCAT and SMOS, 2011/2012 - 2021/2022	Bartsch	b.geos	Bergstedt, Pointner, Muri, Rautiainen	2011	2022	Arctic north of 65°	daily values for grid centres	Rain on snow events	Active and passive microwave data have been combined to identify Rain on snow events	remote sensing, Arctic, rain on snow	Yes ZENODO <a href="https://zenodo.org/records/7575927">https://zenodo.org/records/7575927</a>	csv	Creative commons 4
Circumarctic Landcover Units (v2.0)	Bartsch	b.geos	Khairullin, R., Efimova, A., Widhalm, B., Muri, X., von Baeckmann, C., Bergstedt, H., Ermokhina, K., Hugelius, G., Heim, B., Leibman, M., & Gruber, C.	2016	2024	Arctic north of treeline plus Scandinavia	raster, static	Landcover units at 10m resolution	Sentinel-1 and Sentinel-2 fusion	remote sensing, landcover	Yes ZENODO <a href="https://doi.org/10.5281/zenodo.14235736">https://doi.org/10.5281/zenodo.14235736</a>	geotiff	Creative commons 4
Drained lake basin in situ landcover data, Yamal Peninsula /Erkuta River	Ehrich	UiT	Abdulmanova, Sokolov	26.7. 2016		Erkuta, Yamal	vegetation survey	Drained lake basin in situ vegetation data	vegetation survey	in situ , vegetation	Yes The Cryosphere <a href="https://doi.org/10.5194/tc-18-4703-2024">https://doi.org/10.5194/tc-18-4703-2024</a>	Table (A1) in pdf	Creative commons 4
